

O

Digital versus handwritten note-taking? handwritten note-taking wins in my book, by far. I've experienced writing my notes for class both by hand and on my laptop, and I continue to write my notes handwritten.

I may not have as attractive of notes as Mike Rohde's sketchnotes, but it does me much more justice than doing it on my laptop.

O

I've found that by writing things down by hand just helps me remember what I wrote and this is proven to be true: "a new study finds that people remember lectures better when they're written handwritten notes, rather than typed ones."

I just find that I do better when I take notes with a pen on paper.

However, I have considered changing to take all of my notes online, but I just can't. Although, there are perks to taking notes digitally. I wish that I could save all of my notes forever, and taking notes digitally allows that.

O

To be honest: I do not want my notes to be published and accessed everywhere, for just anyone to see. For example, I began using the app Studyblue for mobile flashcards, but stopped using it. I didn't like the fact that someone else in my class had access to the flashcards I produced, which took me hours to work on.

## 'line of Things'

"Not to boast in another man's line of things  
made ready to our hand." 2 Cor. x. 16.

The Wesleyan Methodist circuit having  
had great sinkings, and being in a dubious  
state, it pleased the Lord to open <sup>the</sup> Primitive  
Methodist "line of things." And on Christmas  
day, 1800, the Lord caused Hugh Brown  
to commence the mighty undertaking in  
a ministerial family visit to his cousin  
Daniel Shubot, son of Harrison Head, near  
~~Kidsgrove~~ and the Staffordshire part of ~~Worcs~~  
~~Worcs~~ ~~Stafford~~, Kidsgrove. The inhabitants  
of these parts were chiefly colliers, <sup>and</sup> seemed  
ungodly and profane to a proverb.

The convincing work had long been ready  
but the ~~line of things~~ <sup>had</sup> declared it to be idle  
to attempt it. Attention to children rose  
in mind by means of the new line of things;  
and on Sunday July 12. 1801, ~~the~~ <sup>the</sup> ~~new~~ <sup>new</sup> ~~work~~

- \* Servers provide application, file, database, print, fax, image, communications, security, systems and network management services.
- \* It is important to understand that a server is an architectural concept, not a physical implementation description.
- \* Client & Server functions can be provided by the same physical device.
- \* With the movement toward peer computing, every device will potentially operate as a client and server in response to requests for service.
- \* Application Servers provide business functionality to support the operation of the client workstation.
- \* In the client/server model, these services can be provided for an entire or partial business function invoked through an Interprocess Communication (Ipc) request for service.
- \* Either message-based requests or RPCs can be used.
- \* A collection of application servers may work in concert to provide an entire business function.
- \* For eg., in a payroll system the employee information may be managed by one application server, earnings calculated by another application server, and deductions calculated by a third application server.
- \* These servers may run different database servers operating systems on various hardware platforms and may use different database servers.
- \* The client app' invokes these services without consideration of the technology or geographic location of the various servers.

File Servers provide record-level data services to nondatabase applications.

File servers allocate space for storage & free space managed by the file server.

Catalog functions are provided by the file server to support file naming and directory structure.

My dear Mr King,

9/11/10

I am taking the liberty  
of sending you a letter on York Political  
affairs. Perhaps you know of some papers  
in New York that would take it. I  
would be very glad to do an occasional  
letter on York Political affairs.

I hope I am not trespassing,  
or going too grossly

Sincerely yours

Patricia Lelum

impromptu, spontaneous in  
the moment: be calm and  
confident; have a structure  
and a framework: answer:  
what? so what? now what?  
important: what you say  
and how you say it. Say  
something of value your  
audience hasn't heard before,  
an insight they haven't  
arrived at yet. visualize  
power, charisma, grace.  
review and reflect to improve  
and grow. The emotion  
you convey is important.  
use an encouraging tone  
of voice.

DATE March 10, 2023

I am writing this with my new LAMY  
Safir Fountain pen, which has been  
filled with Noodler's Polar Brown.

I chose this ink for its quick-drying  
attribute. Much like a quick brown fox...

I have debated long and hard  
about whether I should write  
in cursive, especially when it  
comes to using this pen. While  
I do enjoy the look of my  
cursive when I take my time  
with it, it does take much longer  
to write this way, and I am  
more prone to making mistakes.

But perhaps there is a lesson  
to be learned here. Perhaps I need  
to slow down. Perhaps I write in  
script when I need to get something  
done quickly. Perhaps I should just  
write in my cursive...

cross over to join the optic nerve on the other side, and vice versa. This merges part of the visual field of one eye with part of the visual field of the other eye to create a three-dimensional, stereoscopic vision with a perception of depth and distance. These combined nerves (now called optic tracts) enter the thalamus in the brain. There the sensory information they carry is interpreted by the thalamus and quickly sent to the midbrain. If needed, the midbrain sends out a motor command reflex to blink or move away from something coming toward the eye. The sensory information is also sent to the visual cortex in the right and left occipital lobes of the brain. The visual cortex merges the image from each eye to create a single, three-dimensional image and turns that image so that it is right side up and facing the direction of the original object. Another area in the occipital lobe associates this visual image with long-term visual memories and communicates with the frontal lobe of the brain where decisions are made about the meaning of what was seen and what to do about it. The image of an object travels as sensory information through the optic nerve (cranial nerve II) to the optic chiasm, through the optic tracts, to the thalamus,

flag. Cut like rectangles. Like  
such done with first piece like  
but before doing them take off spikes and  
black paper, other labels spikes and  
bits like together in a separate tray or  
box if well and cool about a hr  
after that mix in a stick of cheese and  
olive oil and honey and put it in a  
sealing bowl full of cold water  
well and after the first few  
hours with

## Assembling of The Jaisals

So I have to go to the garden and get some soil  
and some seeds and then I will plant them in  
the ground and water them and then they will  
grow and I will have fresh vegetables to eat.  
I will also make a small garden in a pot on  
my balcony so I can grow some herbs like basil  
and mint. I will also grow some flowers like sunflowers  
and marigolds. I will use organic fertilizer and water  
them regularly to keep them healthy. I will also  
make sure to rotate my plants every few weeks  
so they don't get too much sunlight or water.  
I will also add some manure to the soil to  
make it more fertile and help the plants grow  
better. I will also use some mulch around  
the base of the plants to help retain moisture  
and prevent weeds from growing. I will also  
keep an eye on the plants for any signs of pests  
or diseases and treat them accordingly. I will  
also take care of the plants by pruning them  
when necessary and removing any dead leaves  
or branches. I will also make sure to water  
them at the right time and amount to avoid  
overwatering or underwatering. I will also  
make sure to give them enough light and  
air circulation to help them grow well.  
I will also use some natural remedies like  
neem oil or neem powder to control pests  
without harming the environment. I will also  
use some organic pest repellents like  
garlic or onion juice to keep pests away.  
I will also use some natural fertilizers like  
compost or manure to feed the plants.  
I will also use some organic pesticides like  
neem oil or neem powder to control pests  
without harming the environment. I will also  
use some organic pest repellents like  
garlic or onion juice to keep pests away.  
I will also use some natural fertilizers like  
compost or manure to feed the plants.

## Wild geese

You do not have to be good.  
You do not have to walk on your knees  
for a hundred miles through the desert repenting;  
you only have to let the soft animal of your body  
love what it loves.  
Tell me about despair, yours, and I will tell you mine.  
Meanwhile the world goes on,  
Meanwhile the sun and the clear pebbles of the air  
are moving across the landscapes,  
over the prairies and the deep trees,  
the mountains and the rivers,  
Meanwhile the wild geese high in the clear blue air,  
are heading home again.  
Whoever you are, no matter how lonely,  
the world offers itself to your imagination,  
calls to you like the wild geese harsh and exciting-  
over and over announcing your place  
in the family of things

Mary Oliver, Dreamwork

Tyger Tyger, burning bright,  
In the forests of the night;  
What immortal hand or eye,  
Could frame thy fearful symmetry?

In what distant deeps or skies  
Burnt the fire of thine eyes?  
On what wings dare he aspire?  
What the hand, dare seize the fire?

And what shoulder, and what art,  
Could twist the sinews of thy heart?  
And when thy heart began to beat,  
What dread hand? And what dread feet?

What the hammer? what the chain,  
In what furnace was thy brain?  
What the anvil? what dread grasp,  
Dare its deadly terrors clasp!

When the stars threw down their spear  
And water'd heaven with their tears?  
Did he smile his work to see?  
Did he who made the Lamb make the

Tyger Tyger burning bright,  
In the forests of the night:  
What immortal hand or eye,  
Dare frame thy fearful symmetry?
